

ALPINE DISTRIBUTION

DUNNAGE AIR BAGS

Alpine distributes air bags for International Dunnage. International Dunnage produces a very high quality air bag and are ISO9001-2000 certified. 100% of the inflating valves pass through an air leakage test before they are used. All finished bags pass through a flat wall test using air pressure to check bags for leakage and a burst test is also randomly applied to bags taken off of the production line. International Dunnage has been able to attain through the highest quality manufacturing process a Level 4 compliance on their Level 3 bags offering a substantial savings to the 4 ply user. No other manufacturer has this approval/certification. Two through ten ply bags are produced in a variety of sizes.

Call Alpine Distribution for up to date prices and availability. We will be happy to help you.
