

## REBAR

Reinforcing bar, also known as rebar, is used to increase the tensile strength of poured concrete. The rebar Alpine Distribution handles is primarily manufactured from 100% recycled domestic steel. This is done in a tightly controlled environment that insures the consistent quality of rebar you expect. Domestic steel assures you of consistent carbon content eliminating soft or brittle bar that import product can be subject to.

Recycling one ton of steel conserves 2500 pounds of iron ore, 1400 pounds of coal, 120 pounds of limestone, uses 40% less water and reduces mining wastes by 97%.

Call Alpine Distribution for current pricing. We will be happy to help you.

Bar Size	Weight (lbs. per ft)	Diameter (in)	Diameter (mm)	Pieces per lift
#3	0.376	0.375	10	264
#4	0.668	0.500	13	152
#5	1.043	0.625	16	96
#6	1.502	0.750	19	68
#7	2.044	0.875	22	50
#8	2.670	1.000	25	38
#9	3.400	1.128	29	30
#10	4.303	1.270	32	24
#11	5.313	1.410	36	18
#14	7.650	1.693	43	15
#18	13.600	2.257	57	6
